

# GSC 2018 - The Annual Workshop of Graduate Students in Systems & Control

Under the auspices of IAAC – the Israeli Association for Automatic Control  
Sponsored by the Faculty of Engineering at Ben-Gurion University of the Negev

## CALL FOR PRESENTATIONS

Dear Friends and Colleagues,

We are pleased to announce GSC'18 — the annual meeting of graduate students in the field of Control and Systems Theory (in the broad sense). This year the event will take place on Monday, April 23, 2018, at Ben-Gurion University of the Negev, building 51 (Ilse Katz Institute for Nanoscale Science & Technology), room 015.

Continuing the successful tradition of previous years, this meeting is intended as a casual platform for exchanging ideas among students and senior faculty from various institutions in Israel. It aims at offering graduate students a stage for sharing insight and excitement about their research in front of a professional audience. The meeting also gives students a unique opportunity to learn about the work of their peers, get acquainted with the Israeli faculty in their field, and meet potential industrial employers. Additionally, GSC events serve a meeting place between academia and industry. We solicit 20–25 minutes presentations by students. Please provide, by March 23, 2018, the following details (PDF, Word or plain text, all in English, sent to [arogeti@bgu.ac.il](mailto:arogeti@bgu.ac.il)):

- ❖ Name and affiliation (department and institution),
- ❖ Degree program (M.Sc. / Ph.D.) and the expected graduation date,
- ❖ Thesis supervisor,
- ❖ Talk title,
- ❖ Talk abstract (up to one page).

Priority, if required, will be given to presentations reporting on final stages of the research and to GSC newcomers. Depending on the number of participants, we are contemplating to organize an interactive session to stimulate discussions and promote ideas exchanges.

As in the last nine years, the VELGER PRIZE will be awarded to the best presentation at the meeting. The prize has been established jointly by Elop and IAAC in memory of the late Dr. Marco Velger, a distinguished member of the Israeli control community. Submission of nomination should only be by the student's supervisor, concurrently with the submission of the student's presentation. The prize regulations can be found on the website of IAAC (<http://iaac.technion.ac.il/education/VelgerPrizeRules.pdf>).

The success of the event depends on the active participation of both the students and the faculty members, so we hope that you and your students will be able to join us. We would also appreciate your help in spreading this call to relevant faculty who may not be on our mailing list, especially newcomers and researchers with adjacent interests.

We look forward to receiving your contributions.

With best wishes,

Shai Arogeti (GSC'18 organizer)

Moshe Idan (IAAC president)
